

Area de un círculo

El área es la medida de la superficie que abarca.

Como hallar el area de un Círculo.

Formula

$$A = \pi \cdot r^2$$

$$A = 3.1416 \cdot 7^2$$

$$A = 3.1416 \cdot 49$$

$$A = 153.9384 = 153.9394$$

$$A = \pi \cdot r^2$$

$$A = 3.1416 \cdot 11^2$$

$$A = 3.1416 \cdot 121$$

$$A = 380.1336$$

$$A = \pi \cdot r^2$$

$$A = 3.1416 \cdot 9^2$$

$$A = 3.1416 \cdot 81$$

$$A = 254.469 = 254.47 \text{ cm}$$

$$A = \pi \cdot r^2$$

$$A = 3.1416 \cdot 8.25^2$$

$$A = 3.1416 \cdot 68.06$$

$$A = 213.817 = 213.82 \text{ cm}$$

$$A = \pi \cdot r^2$$

$$A = 3.1416 \cdot (5.5)^2$$

$$A = 3.1416 \cdot 30.25^2$$

$$A = 95.03 \text{ cm}^2$$

$$A = \pi \cdot r^2$$

$$A = 3.1416 \cdot (2.25)^2$$

$$A = 3.1416 \cdot 5.0625$$

$$A = 15.89 \text{ cm}^2$$

$$A = \pi \cdot r^2$$

$$A = 3.1416 \cdot (7.20)^2$$

$$A = 3.1416 \cdot 51.84$$

$$A = 162.86 \text{ cm}^2$$

$$A = \pi \cdot r^2$$

$$A = 3.1416 \cdot (3.5)^2$$

$$A = 3.1416 \cdot 12.25$$

$$A = 38.48 \text{ cm}^2$$

4.8 cm

$$A = \pi \cdot r^2$$

$$A = 3.1416 \cdot 2.4^2$$

$$A = 3.1416 \cdot 5.76$$

$$A = 18.095 = 18.09 \text{ cm}^2$$
