

La Distancia recorrida en horas por un  
automovil con movimiento uniforme a una  
velocidad de 80 Km/h.

$$s = v \times t = 80 \text{ Km/hr} \times 5 = 400$$

$$s = v \times t = 80 \text{ Km/hr} \times 1 = 80 \text{ Km}$$

$$s = v \times t = 80 \text{ Km/hr} \times 2 = 160 \text{ Km}$$

$$s = v \times t = 80 \text{ Km/hr} \times 3 = 240 \text{ Km}$$

$$s = v \times t = 80 \text{ Km/hr} \times 4 = 320 \text{ Km}$$

$$s = v \times t = 80 \text{ Km/hr} \times 5 = 400 \text{ Km}$$

3) La distancia recorrida en 3 horas por un móvil con movimiento uniforme a una velocidad de 75 km/h

$$s = v \times t = 75 \text{ km/h} \times 3 \text{ h} = 225 \text{ km}$$

$$s = v \times t = 75 \text{ km/h} \times 1 = 75 \text{ km}$$

$$s = v \times t = 75 \text{ km/h} \times 2 = 150 \text{ km}$$

$$s = v \times t = 75 \text{ km/h} \times 3 = 225 \text{ km}$$

1) La distancia recorrida en 2 horas por un automóvil con movimiento uniforme a una velocidad de 60 km/h.

$$s = v \times t = 60 \text{ km/h} \times 2 \text{ h} = 120 \text{ km}$$

$$s = v \times t = 60 \text{ km/h} \times 1 \text{ h} = 60$$

$$s = v \times t = 60 \text{ km/h} \times 2 \text{ h} = 120$$

2) Un movimiento de un automóvil que viaja a 5 m/s, con movimiento uniforme en 5 segundos

$$s = v \times t = 5 \text{ sg} \times 5 \text{ m/s} = 25 \text{ mt.}$$

$$s = v \times t = 5 \text{ m/s} \times 1 \text{ sg} = 5 \text{ mt}$$

$$s = v \times t = 5 \text{ m/s} \times 2 \text{ sg} = 10 \text{ mt}$$

$$s = v \times t = 5 \text{ m/s} \times 3 \text{ sg} = 15 \text{ mt}$$

$$s = v \times t = 5 \text{ m/s} \times 4 \text{ sg} = 20 \text{ mt}$$

$$s = v \times t = 5 \text{ m/s} \times 5 \text{ sg} = 25 \text{ mt}$$

(sg)

7) La Distancia recorrida en horas por un automóvil con movimiento uniforme a una velocidad de 80 Km/h.

$$S = v \times t = 80 \text{ Km/hr} \times 5 = 400$$

$$S = v \times t = 80 \text{ Km/hr} \times 1 = 80 \text{ Km}$$

$$S = v \times t = 80 \text{ Km/hr} \times 2 = 160 \text{ Km}$$

$$S = v \times t = 80 \text{ Km/hr} \times 3 = 240 \text{ Km}$$

$$S = v \times t = 80 \text{ Km/hr} \times 4 = 320 \text{ Km}$$

$$S = v \times t = 80 \text{ Km/hr} \times 5 = 400 \text{ Km}$$
