

Tabla 1

P_x	Q_x	E	Tipo de Elasticidad	%
60	200	6.25		50%
65	300		Elastica	

$$\Delta Q_0 = \frac{300 - 200}{200} = \frac{100}{200} = 0.50 \times 100 = 50\%$$

$$\% \Delta P = \frac{65 - 60}{60} = \frac{5}{60} = 0.08 \times 100 = 8\%$$

$$\Delta Q_0 = \frac{50}{8} = 6.25$$

TABLA 2

P_x	Q_x	E	Elasticidad	%
80	525	0.26		19%
95	550		Inelástica.	

$$\Delta Q_0 = \frac{550 - 525}{525} = \frac{25}{525} = 0.05 \times 100 = 5$$

$$\% \Delta P = \frac{95 - 80}{80} = \frac{15}{80} = 0.19 \times 100 = 19\%$$

$$\Delta Q_0 = \frac{5}{19} = 0.26$$

$$\% \Delta P = 19$$
