

Tarea:

$$1) 2^3 + 3^3 + 4^3 = 8 + 27 + 64 = 99$$

$$2) 13^2 + 3^2 + 10^2 = 169 + 9 + 100 = 278$$

$$3) 7^2 - 4^3 = 49 - 64 = 15$$

$$4) (122)^3 (122) = 1,815,848 = 122 = 1,815,726$$

$$5) (20^4) - (5^5) = 160,000 - 3,125 = 156,875$$

$$6) 13^2 + 3^2 + 10^2 = 169 + 9 + 100 = 278$$

$$7) 5^3 + 5^6 + 5 = 125 + 15,625 = 15,750$$

$$8) (11^2) + (7^2) = 121 + 49 = 170$$

$$9) 100^3 - 6^4 = 1,000,000 - 1,296 = 998,704$$

$$10) 10^4 + 10^5 + 10^7 = 10,000 + 100,000 + 10,000,000 = 10,110,000$$

$$11) 6^3 - 3^3 = 216 - 27 = 189$$

$$12) 11^2 + 11^4 = 121 + 14,641 = 14,762$$

$$13). 2^2 + 2^3 + 2^4 = 4 + 8 + 16 = 28.$$

$$14). 5^2 - 2^4 = 25 - 16 = 9.$$
