

EXERCÍCIOS

2

(A) $25,400 = 0.0254 \times 10^7$

(B) $0.00000000089 = 8.9 \times 10^{-10}$

(C) $4,376.5 = 4.3765 \times 10^3$

(D) $9,800,000,000 = 9.8 \times 10^9$

(E) $1,254.96 = 1.25496 \times 10^3$

(F) $96,300,000 = 9.63 \times 10^7$

$$\textcircled{g} \quad \underline{89,345} = \underline{8.9345 \times 10^4}$$

$$\textcircled{h} \quad \underline{78.900} = \underline{7.89 \times 10^1}$$

$$\textcircled{i} \quad \underline{66.7} = \underline{6.67 \times 10^1}$$

Ejercicio (B)

$$\textcircled{A} \quad \underline{2.51 \times 10^8} = \underline{251,000,000}$$

$$\textcircled{B} \quad \underline{9.32 \cdot 10^{-8}} = \underline{0.0000000932}$$

$$\textcircled{C} \quad \underline{98 \cdot 10^{-6}} = \underline{0.000098}$$

$$\textcircled{D} \quad \underline{7.892 \cdot 10^{-5}} = \underline{0.00007892}$$

$$\textcircled{E} \quad \underline{100 \cdot 10^{10}} = \underline{10,000,000,000}$$

$$\textcircled{f} \quad \underline{9.78 \times 10^9} = \underline{000000009.78 \times 10^9}$$

$$\textcircled{g} \quad \underline{5.62 \times 10^{-8}} = \underline{00005.62 \times 10^{-8}}$$

$$\textcircled{h} \quad \underline{890 \times 10^5} = \underline{890.00000 \times 10^5}$$

$$\textcircled{i} \quad \underline{4.33 \times 10^9} = \underline{000000004.33 \times 10^9}$$
