

## Performance 3

My name is Rosana, my father owns several companies, he is a millionaire and he likes to work.

Many people tell me that my life must be very easy because my father is a millionaire, but no, I am a simple young woman who does not have money, my father always tells me that I work hard to get what I want, and that he is a millionaire does not mean that I do not have to work. I study in the mornings and in the afternoons I work with my father to learn about the business, I do not like to work, because many times it is very tired and my head hurts, but I know that if I do not do it now in the future I will be poor.

I wish one day to be like my father, and I know that with your advice and support I will be.
